## CERTIFICATE IN IMPLANT DENTISTRY

### Venue:

The Northumberland Institute of Dental Medicine  
58 Northumberland Road  
Ballsbridge  
Dublin 4

### Cost:

€7,500.00 payable on application.  
Save €500.00 when you pay fees before 14th February 2017.  
Participants may opt to charge patients for treatment provided.

This fee covers: tuition, pre-lecture hand-outs, course text book, course notes, and materials for practical sessions. This also includes implants, surgical and prosthetic requirements to complete two cases of single unit restorations. The participants will only be responsible for the laboratory costs.

Lunch and refreshments will be provided each day.

### CPD POINTS WILL APPLY

This event is kindly sponsored by Straumann UK Ltd  
[www.straumann.com](http://www.straumann.com)

### Presented by:

Dr Anne O'Donoghue  
Dr Maher Kemmoona  
Prof Brian O'Connell  
Dr Rory Boyd  
Dr Frank Houston (Guest Speaker)

### Commencing March 2017

The Northumberland Institute of Dental Medicine is delighted to offer a first-class course on implantology in dentistry, specifically aimed at the primary care clinician who wants to diversify and increase their skill set.

### Course objectives:

This is a largely clinical-orientated course which concentrates on the management and treatment planning, surgical, and restorative procedures of dental implant therapy within the general dental practice environment. It is designed to give a thorough grounding in the principles and practice of implantology. You will participate in clinical implant placement and prosthodontic rehabilitation.

This is a highly interactive and practical course and has proven to develop treatment planning skills in implant dentistry.

### Course dates:

Day 1	Saturday 4th March	Introduction
Day 2	Saturday 25th March	Implant placement in models
Day 3	Saturday 10th June	Clinical placement of implants
Day 4	Saturday 17th June	Clinical placement of implants
Day 5	Saturday 23rd September	Second stage surgery
Day 6	Saturday 11th November	Prosthodontics theory and practical
Day 7	Saturday 25th November	Impressions
Day 8	Saturday 9th December	Fitting of final prosthesis
Day 9	Saturday 20th January 2018	Review of cases and discussion

## Testimonials from previous candidates

“

When our patients began asking for implants, we decided that it was time to offer implant treatment options in- house, so I applied for the IFPDC/NIDM implant certificate, which I completed in 2012. The certificate course started with identifying which patients can be treated by GDPs using the SAC classification, and which cases would be better referred to a specialist. With the course tutors, we then developed treatment plans for suitable cases using patients from our own practice, and implant surgery and restorations were carried out under supervision. Throughout the course there was great advice and troubleshooting.

Most sessions were carried out at weekends, which minimised the amount of time away from the practice. It was left to us to decide what fee patients were charged for treatment during the certificate course, and this helps to offset the cost of the course.

Since completing the certificate course we have placed and restored implants within our own practice. Furthermore, our tutors are still available to offer advice and feedback on cases. The IFPDC/NIDM implant course is a well-run, well-structured course as an introduction to implant treatment, offering great value for money."

***Dr Noel Henderson, GDP, Roscommon***

“

A great entry level course for those who are interested in offering dental implants to their patients. Before I began this course I was restoring some implants but now I am restoring more and also placing implants."

***Brian Byrne, Sligo***

“

This course has not only solidified my knowledge in implant dentistry, but has also given me the confidence to actually place and restore single implants in practice as part of my routine work. The tutors were equally very approachable and always happy to discuss our clinical cases in great detail. Their ongoing support and enthusiasm has greatly motivated me and equipped me with better skills and clinical ability."

***Nicola Zammit***
